SKIN TIGHTENING.....\$99

FROM 10 MINUTES. Skin tightening by radio frequency (RF) is a non-surgical procedure that tightens the slack skin & makes the fine lines & wrinkles look softer, giving the face a younger texture. The therapy is based on high-frequency radio waves that heat the dermis & the collagen fibres of the face contracting the skin.

OMNILUX MEDICAL REVIVE LED.....\$99 \$99 single session. \$69 to add to any facial or \$594 for 6 - receive 2 FREE

Light Emitting Diodes stimulates cellular activity. As cellular activity increases, cells become more permeable and responsive to exogenous factors. Blood flow increases, leading to greater tissue oxygenation and detoxification. Skin appears clearer with less fine lines, is plumped up and hydrated.

The effect of active skincare products can be greatly enhanced. Treatments are completely comfortable, suit any skin type and only take 20 minutes.

De-stress | Nourish & Repair | Hydrate & Plump | Soothe & Calm

ALMA CLEAR LIFT HOLLYWOOD LASER FACIAL.....\$350 Bonus purchase 3 Clear Lift Laser Facials and receive 3 OMNILUX LED sessions free

ClearLift is a non-ablative approach to laser skin resurfacing. Treatments are fast and virtually painless with visible results and no downtime. The innovative technology delivers a controlled dermal wound deep beneath the skin, (up to 3mm in depth). The outer layer of the skin is left undamaged. All stages of healing and skin repair occur under the intact epidermis.

ALMA - HARMONY XL PRO LASER TATTOO REDUCTION.....from \$150 per tattoo

Picosecond laser technology was introduced as a groundbreaking new option for effectively treating tattoos. This next-generation laser tattoo removal technology uses ultrashort pulses to target ink particles. These pulses are able to shatter pigment into tiny particles that are more easily absorbed and cleared by the body. Quite simply, picosecond laser tattoo removal technology enables your laser clinician to eliminate tattoos in fewer treatments enabling faster results and in return, a happier client. Ask us about our Complimentary Radiation Tattoo Mark Removal Program. With clearance from the oncologist, it is safe and effective to reduce the visible signs of a tattoo from radiation treatment.

ALMA - HARMONY XL PRO LASER SKIN RESURFACING..... \$399

Laser Skin Resurfacing Treatments for aged skin can remove years of damage in as little as one quick treatment. Clients who present with acne scars, fine lines & wrinkles, irregular texture and even sun-induced "blotchiness" or redness can benefit from laser skin resurfacing. Traditional laser skin resurfacing treatments were often harsh, painful and required significant downtime. Recent innovations in non-ablative fractioned skin resurfacing have made these treatments quite popular, due to minimal downtime and excellent results. Treatments can be performed on the face, neck, chest, arms and hands.

ALMA - HARMONY XL PRO Treatments for Vascular Lesions, Rosacea and Pigmentation Spot treatment..... from \$79 Full face..... \$279

AFT (Advanced Fluorescence Technology) converts unused light into the usable spectrum, increasing emission and penetration into the treatment area and allowing for lower fluence to be used to achieve the desired outcome. The appearance of pigmented lesions can be successfully cleared by inducing selective photothermolysis of the melanin chromophore in the targeted tissue.
